**Report description:**

The demand for Ethylene Vinyl Acetate (EVA) in Chile is anticipated to increase with the rising population. Due to the rising population, the demand for EVA in footwear and packaging has increased which will subsequently increase the demand for EVA-based foams. Chile is one of the popular locations for the manufacturing of footwear in South America. In the forecast years, the demand for EVA in Adhesives and Solar Cell Encapsulation is also expected to boost the demand for Ethylene Vinyl Acetate in Chile. Chile's EVA demand stood at 2.50 Thousand Tonnes in 2020 and is forecast to reach 4.04 Thousand Tonnes by 2030, growing at a healthy CAGR of 5.01% until 2030. Chile ethylene vinyl acetate market experienced severe setbacks due to the recent pandemic situation. The outbreak of COVID-19 in 2020 disrupted the world economy. The market growth was affected drastically, and production units shut down. Furthermore, the major market players intentionally halted the production keeping their employees' health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period. Potential investment in the market is expecting steady growth in the market in the forecast period, until 2030.
