Report description:

North America Acetone demand stood at 1.78 Million Tonnes in 2020 and is forecast to reach 2.52 Million Tonnes by 2030, growing at a healthy CAGR of 3.74% until 2030. The rising demand for Acetone in North America can be primarily attributed to its versatile application as a solvent in various industries like pharmaceuticals, cosmetics, paints and coatings, adhesives, and others. Since Acetone is a highly valuable and cost-efficient feedstock, the chemical is widely used for the manufacturing of its derivatives like Isopropyl Alcohol, Bisphenol A, and Methyl Methacrylate, which is adding to the market growth of the North America Acetone market.

The COVID-19 outbreak and US anti-dumping duties on Acetone reduced the import volumes flowing into the North American market. As the majority of production units shut down due to the lockdown restrictions, the demand for Acetone reduced significantly. However, the growing use of Acetone for the manufacturing of pharmaceutical products and smartphone components reinstated the usual volume of the versatile chemical, which led to a positive impact on the North America Acetone market.

Under this subscription, you would be able to access North America Acetone market demand and supply analysis on a cloud-based platform for one year.
