Report description:

South America Methanol demand stood at 4.32 Million Tonnes in 2020 and is forecast to reach 7.15 Million Tonnes by 2030, growing at a healthy CAGR of 4.08% until 2030. The rising demand for bio-based chemical commodities across various end-user industries like automotive, construction, paints and coatings, etc., are set to drive South America Methanol during the forecast period. Besides, the demand for Methanol in South America is likely to grow significantly in the forecast period on account of strong government support for adopting Methanol as a new generation renewable resource due to its eco-friendly attribute and low production cost.

The COVID-19 disrupted the world economy with repeated lockdown restrictions, a temporary halt on production activities, and limited mobility of personnel, which affected the South America Methanol market negatively. However, as the construction and industrialization activities resumed, the demand for Methanol grew back to the usual volume. In the coming years, the rising inclination of industries towards using cleaner fuels for a safer environment is likely to contribute to the growth of the South America Methanol market.
