Report description:

APAC plastic recycling market stood at 90.32 Million Tonnes in 2020 and is forecast to reach 149.735 Million Tonnes by 2030, growing at a healthy CAGR of 4.78% until 2030. The increasing demand for plastics in the chemical and petrochemical industry is expected to drive the demand for plastic recycling in the region. Also, the growing demand for plastic recycling from other industries such as electrical & electronics, automotive, packaging industry, etc. owing to the increasing need for plastics components is boosting the plastic recycling market. Despite the slowdown of the global economy on account of the COVID-19 pandemic, the plastic recycling market is expected to witness robust growth during the forecast period owing to the increased use of plastic components in the pharmaceutical and healthcare sector. Moreover, rising government initiatives such as 'Make in India' in emerging nations and revised FDI policies are enticing core companies to set up manufacturing units in the region, which is likely to propel the plastic recycling market during the forecast period.
