Report description:

Vietnam is largely dominated by two-wheelers, with motorcycles and mopeds accounting for 94% of all vehicles used as of 2022. Light vehicle sales are forecast to grow by 10.9% over 2022-2027. Large cars, including SUVs and crossovers, and multipurpose cars, are the most popular choices, accounting for major shares, and are also forecast to see the fastest growth over 2022-2027. Electric vehicles have potential for growth over 2022-2027, supported by new government initiatives.

Euromonitor International's Mobility in Vietnam report offers a comprehensive guide of the traditional and newly emerging mobility forms. The report is broken down into five key areas of industry research: automotive sales and ownership, electric and alternative fuel vehicles, shared mobility, public transport, and autonomous vehicles and connectivity. It provides the latest automotive sales and registration and shared mobility data over 2015-2020, allowing you to identify the sectors driving growth. It assesses the strategic analysis of key factors influencing the market - be they legislative, consumer lifestyle or economic. Forecasts in the reports are available to 2025.
