### **Report description:**

#### KEY HIGHLIGHTS OF THE REPORT

- Indonesia is one of the major economies among ASEAN countries. The data center market in Indonesia has been growing rapidly and is the second major market after Singapore.
- The Indonesia data center market has several local and global colocation operators and newer players. The rapid growth in digitalization in the MSME sector and the increase in the number of technology firms in the country will keep driving colocation demand in the market.
- Indonesia hosts around 74 operational colocation data centers, most of which are developed according to Tier III standards. The country has local and global operators such as Telkom Indonesia, NTT Global Data Centers, DCI Indonesia, Biznet Data Center, etc.
- The significant increase in demand for cloud storage is driving cloud operators to invest in the market by opening cloud regions or establishing an on-ramp presence in colocation data centers. For instance, In October 2022, Huawei Cloud planned to launch a new cloud region in Indonesia with three availability zones in Jakarta, Indonesia.
- In terms of connectivity, Indonesia has over 50 existing submarine cables, such as the Australia-Singapore cable, Batam Sarawak Internet Cable System (BaSICS), JaKa2LaDeMa, Jakarta-Bangka-Bintan-Batam-Singapore (B3JS), Moratelindo International Cable System-1 (MIC-1), SeaMeWe-5, and others. The cables connect Indonesia to markets such as Australia, Singapore, Saudi Arabia, France, Egypt, the UAE, Malaysia, Oman, and others.
- Due to the availability of several port locations, the country has several cables that connect one port to another, thus increasing internal connectivity. For instance, the JaKa2LaDeMa cable connects locations in Indonesia such as Denpasar, Mataram, Sangata, Beculuk, Toweli, and others.
