Report description:

The country research report on Germany AI in IoT market is a customer intelligence and competitive study of the Germany market. Moreover, the report provides deep insights into demand forecasts, market trends, and, micro and macro indicators in the Germany market. Also, factors that are driving and restraining the AI in IoT market are highlighted in the study. This is an in-depth business intelligence report based on qualitative and quantitative parameters of the market. Additionally, this report provides readers with market insights and a detailed analysis of market segments to possible micro levels. The companies and dealers/distributors profiled in the report include manufacturers & suppliers of the AI in IoT market in Germany.
Segments Covered
The report on AI in IoT market provides a detailed analysis of segments in the market based on Component, Technology, and Industry Vertical.
Segmentation Based on Component
- Platform
o Device Management
o Application Management
o Connectivity Management
- Software
o Real-time Streaming Analytics
o Security
o Data Management
o Remote Monitoring
- Services
o Professional Services
o Managed Services
Segmentation Based on Technology
- ML and Deep Learning

- Natural Language Processing (NLP)

Segmentation Based on Industry Vertical

- Manufacturing
- Energy and Utilities
