Report description:

The India quinoa market size reached 62,263 Tons in 2022. Looking forward, IMARC Group expects the market to reach 232,991 Tons by 2028, exhibiting a growth rate (CAGR) of 24.6% during 2022-2028.

Quinoa refers to a whole grain crop, belonging to the Amaranth family, which produces edible seeds and leaves. It is a gluten-free food product containing a high amount of zinc, iron, fibers, antioxidants, vitamin B and E, etc. Quinoa aids in reducing the risk of cardiovascular diseases, improving metabolism, controlling high blood pressure levels, enhancing skin health, maintaining blood sugar, etc. In India, it is widely adopted across diverse sectors, including food and beverages, cosmetics, pharmaceuticals, animal feed, etc.

The rising consumer health concerns towards the high prevalence of numerous lifestyle diseases, including diabetes, obesity, cardiovascular ailments, gastrointestinal disorders, etc., are primarily driving the demand for quinoa in the country. Furthermore, the growing consumer awareness towards numerous health benefits of quinoa in maintaining blood cholesterol, improving immunity, promoting healthy gut microbes, and managing hypertension, is also propelling the market growth. Additionally, the increasing adoption of healthy dietary patterns is further augmenting the consumption of low-calorie and gluten-free products, such as quinoa. Apart from this, the rising popularity of western food trends in India has led to the wide availability of quinoa-based bread, pasta, noodles, cookies, etc. Moreover, the hectic consumer work schedules and sedentary lifestyles are catalyzing the demand for convenient and ready-to-eat food options, including quinoa-based muesli and flakes. Besides this, the expanding cosmetic and personal grooming sector in India is further bolstering the utilization of quinoa for dark spot reduction, skin rejuvenation, acne treatment, etc. Additionally, the Indian government has introduced numerous initiatives for promoting the cultivation of drought-tolerant and sustainable crops, such as quinoa, which will further continue to drive the market growth in the coming years.
