Report description:

The Europe greens powder market is expected to grow from US\$ 79.61 million in 2023 to US\$ 134.08 million by 2030. It is estimated to grow at a CAGR of 7.7% from 2023 to 2030.

Increasing Preventive Healthcare Expenditure Fuel Europe Greens Powder Market

The term preventive healthcare refers to measures taken to prevent diseases and infections. In the recent years, health awareness among people has increased significantly. Due to busy lifestyle and hectic work schedules, people cannot concentrate on their health, fitness, and regular diet. This has led to increase in prevalence of various diseases such as obesity, diabetes, high blood pressure, skin problems, and digestive issues. Therefore, people increasingly focus on preventive health and prefer dietary supplements that provide enhanced nutritional benefits. Greens powder is a powdered dietary supplement made with a nutritious combination of dried or blended plants and then formed into a powder. Common ingredients include wheatgrass, spirulina, chlorella, kelp, pineapple, kale, beetroot, green tea extract, green herbs, probiotics, and some digestive enzymes. The greens powder delivers the benefits of leafy green vegetables and other ingredients that contain health-boosting vitamins and minerals. Greens powder has a green hue and a grassy taste. It is nearly possible these days, especially for vegans, to achieve the Recommended Dietary Allowance (RDA) guidelines regarding the intake of essential amounts of fruits and vegetables. Consumption of greens powder in the morning or alongside meals can be a great way of accomplishing the required nutrients and antioxidants. The rising aging population and increasing awareness for preventive healthcare drives the demand for health preventive products, including greens powder.

Europe Greens Powder Market Overview

The Europe greens powder market in Europe is segmented into Germany, France, the UK, Italy, Russia, and the Rest of Europe. Greens powder gained traction among health-conscious consumers in the region owing to its numerous benefits, such as immunity boost, detoxification of the body, and stress reduction. According to European Commission (EC), total expenditure on preventive healthcare for all European Union (EU) member countries amounted to US\$ 39.6 billion in 2019. Greens powder sourced from probiotics helps to prevent gut-related health problems such as gastrointestinal diseases, constipation, inflammatory bowel disease (IBD), and irritable bowel syndrome (IBS). As a result, there is a high consumer expenditure on preventive healthcare in European countries, especially Italy, Germany, Finland, and Sweden. Thus, the demand for greens powder is increasing to help improve digestive and immune health. Hence, the expenditure on nutraceutical supplements such as greens powder has risen considerably in Europe.

Europe Greens Powder Market Revenue and Forecast to 2030 (US\$ Million)

Europe Greens Powder Market Segmentation

The Europe greens powder market is segmented into product type, distribution channel and country.

Based on product type, the Europe greens powder market is segmented into fermented greens, marine sources, grass sources, and others. The others segment held the largest share of the Europe greens powder market in 2023.

Based on distribution channel, the Europe greens powder market is bifurcated into online sales and offline sales. The offline sales segment held a larger share of the Europe greens powder market in 2023.

Based on country, the Europe Greens powder market is segmented into the Germany, France, the UK, Italy, Russia, and the Rest of Europe. The Rest of Europe dominated the Europe greens powder market in 2023.

Athletic Greens (USA) Inc, Martin & Pleasance Wholesale Pty Ltd, Iovate Health Sciences International Inc, and Lean Greens Ltd are some of the leading companies operating in the Europe greens powder market.
