Report description:

KEY HIGHLIGHTS OF THE REPORT

- Thailand is among Southeast Asia's emerging and ideal hubs for data center development due to easy access to major markets like China, India, Malaysia, and other locations.
- Thailand has around 30 operational colocation data centers, which will increase as several existing and new companies have planned investments in the country.
- The market is witnessing the entry of several global colocation operators such as OneAsia Network, Telehouse, Evolution Data Centres, Edge Centres, CtrlS Datacenters, AIS-Singtel Gulf Energy, and other companies.
- The global operators are using M&A and JV strategies to enter the market. For instance, Bridge Data Centres acquired a data center facility from WHA to enter the Thailand data center market and expand its presence.
- The support for the development of data centers in Thailand is high. In September 2022, the Thai Cabinet passed a bill to exempt data centers from VAT. The measure was taken to promote data center investments across the country.
- The increase in digitalization initiatives is boosting the data center market. In line with the Thailand 4.0 initiative, the country aims to have over 100 smart cities by 2024.
- Thailand is witnessing growth in connectivity with submarine cables, connecting significant locations worldwide. Five upcoming submarine cables will connect Thailand with other countries.
