- Team License \$1500.00
- Enterprisewide \$2900.00

Report description:

REPORT OVERVIEW

This report analyzes the complete US Mobile Medical Imaging market in-depth-exhaustive information regarding adopting advanced mobile medical imaging in the US healthcare settings.

Several independent living facilities have increased in the US. This will increase the demand for mobile medical imaging as the separate living facilities engage with mobile imaging service providers. Long-term care centers, palliative care, and home care are adopted mainly in the US; these are increasing the demand for mobile medical imaging services in the market.

MARKET DEFINITION

Patients initially travel from one place to hospitals to get medical imaging. Nowadays, the equipment travels to the patients for medical imaging procedures. A separate set of companies provide this service. This mobile medical imaging segment is growing faster in the market.

KEY HIGHLIGHTS:

- There are mobile medical imaging service providers in the US market, which has increased. The COVID-19 pandemic has increased the demand for mobile medical imaging services in the US.
- There are around 6000 functioning ASCs in the US, increasing constantly. The introduction of ASCs has revolutionized the US healthcare segment. The hospital outpatient settings have shifted to the ASCs in the market. ASCs are also a specialty that uses mobile medical imaging services.
- The x-rays are one of the most used modalities. X-ray is majorly used for diagnosing bone fractures. Over five lakh manufacturing

facilities are prone to accidents and require immediate treatment, including diagnostics. These demand the use of mobile medical imaging segments.

-□The chest CT was considered beneficial in managing COVID-19 as it can determine the severity and extent of COVID-19 pneumonia. Mobile CT allows a rapid diagnosis of COVID-19 while minimizing the risk of infection. The chest CT was considered beneficial in managing COVID-19 as it can determine the severity and extent of COVID-19 pneumonia. Mobile CT allows a rapid diagnosis of COVID-19 while minimizing the risk of infection.

-□Per pregnancy delivery requires around 5.4 ultrasounds. In the US, there are more than three million pregnancies, and there are patients who prefer the use of mobile medical imaging for their checkups instead of alternative options.

VENDORS

Key Vendors

- KMG
- DMS Health
- Shared imaging

Other Prominent Vendors

- Accurate Imaging Diagnostics
- Alliance-Hni Health Care Service
- Alpha One Imaging
- Atlantic Medical Imaging
- Catalina Imaging
- Digirad
