Report description:

The global stucco market size reached US\$ 11.4 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 14.7 Billion by 2028, exhibiting a growth rate (CAGR) of 4.33% during 2022-2028.

Stucco is a plaster made by mixing cement, sand, and lime in different quantities with a wide range of pigments and other additives to give a desired color, texture, and finish to the structure. It is used to cover interior and exterior surfaces of walls, ceilings, and floors as well as make cornices, moldings, and other decorations. It is suitable for both hot and cold climates as it requires less maintenance and can withstand harmful sun rays. Nowadays, several manufacturers are offering hard, durable, economic, and fire-resistant product variants that can be applied over a variety of materials, such as steel, clay, brick, wood, and concrete.

Stucco Market Trends:

Governing agencies of various countries are easing lockdown restrictions imposed by them to prevent the large-scale spread of the coronavirus disease (COVID-19). This is facilitating the revival of the construction sector. In addition, changing lifestyles, rapid urbanization, and inflating income levels are catalyzing the demand for modern homes, which represents one of the key factors bolstering the market growth. Besides this, several initiatives undertaken to boost infrastructure development, especially in developing nations, are also contributing to market growth. Moreover, due to the growing working population and the trend of modern offices, stuccos are gaining traction in commercial establishments for enhanced aesthetics. Apart from this, leading manufacturers are launching novel designs with added benefits suitable for various applications. They are also emphasizing on mergers and acquisitions (M&A), collaborations, and partnerships with other companies to introduce innovative products. For instance, Sika AG, a construction chemical company, acquired Parex Group, which is a UK-based manufacturer of construction materials, to expand its product portfolio of building finishing materials.
