Report description:

The global note sorter market size reached US\$ 6.2 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 10.3 Billion by 2028, exhibiting a growth rate (CAGR) of 8.83% during 2022-2028.

A note sorter is a machine that optimizes the cash management process by effectively sorting and bundling banknotes. It is convenient and provides increased productivity, efficiency, and security. It is widely utilized in organizations that handle a large deposit of money, such as banks, casinos, theme parks, self-service kiosks, and transit services. Nowadays, several manufacturers are offering an upgraded, intelligent, and reliable note sorter, which is integrated with optical inspection and image processing technology to identify fake denominations.

Note Sorter Market Trends:

Manual cash processing is usually ineffective and time-intensive and involves a high risk of error. As a result, organizations from different industry verticals are adopting note sorters for smooth, efficient, and continuous processing of large volumes of banknotes. In addition, it helps in reducing operational expenses, minimizing the risk of internal theft, and declining financial losses. This, along with the considerable need for hassle-free handling of huge cash deposits, is positively influencing the utilization of note sorters in the banking, financial services, and insurance (BFSI) sectors. Apart from this, the emerging trend of theme amusement parks is also contributing to market growth. In addition, the growing popularity of casinos and other gambling games is catalyzing the demand for note sorters for keeping track of the sales. Furthermore, the increasing focus of leading players on mergers and acquisitions (M&A) is creating a positive outlook for the market. For instance, Crane Payment Innovations (CPI), Inc., a Crane Co. subsidiary and global leader in banknote and coin validation, acquired Cummins Allison, which is a leading provider of coin, currency, and check handling solutions to lead innovations in existing products and services.
