Report description:

The report on the global 23 valent pneumococcal polysaccharide vaccine market provides qualitative and quantitative analysis for the period from 2021-2030. The global 23 valent pneumococcal polysaccharide vaccine market was valued at USD 2,112.97 million in 2022 and is expected to reach USD 4,212.53 million in 2030, with a CAGR of 9.06% during the forecast period 2023-2030. The study on 23 valent pneumococcal polysaccharide vaccine market covers the analysis of the leading geographies such as North America, Europe, Asia Pacific, and RoW for the period of 2021-2030.

The report on 23 valent pneumococcal polysaccharide vaccine market is a comprehensive study and presentation of drivers, restraints, opportunities, demand factors, market size, forecasts, and trends in the global 23 valent pneumococcal polysaccharide vaccine market over the period of 2021-2030. Moreover, the report is a collective presentation of primary and secondary research findings.

Porter's five forces model in the report provides insights into the competitive rivalry, supplier and buyer positions in the market and opportunities for the new entrants in the global 23 valent pneumococcal polysaccharide vaccine market over the period of 2021-2030. Further, IGR- Growth Matrix given in the report brings an insight into the investment areas that existing or new market players can consider.

Report Findings

1) Drivers

- The 23-valent pneumococcal polysaccharide vaccine market is driven by the increasing geriatric population.
- Rising government initiatives and vaccination programs fuel the market growth.

2) Restraints

3) Opportunities

- The pricing issues make the vaccine less accessible, particularly in low-income regions can act as a barrier to the market growth.
- The continued expansion of vaccination programs, in developed and developing regions, presents a prominent opportunity for market growth.

Research Methodology

A) Primary Research

Our primary research involves extensive interviews and analysis of the opinions provided by the primary respondents. The primary research starts with identifying and approaching the primary respondents, the primary respondents are approached include

1. Key Opinion Leaders associated with Infinium Global Research
2. Internal and External subject matter experts
3. Professionals and participants from the industry

Our primary research respondents typically include

1. Executives working with leading companies in the market under review
2. Product/brand/marketing managers
3. CXO level executives
4. Regional/zonal/ country managers
5. Vice President level executives.

B) Secondary Research

Secondary research involves extensive exploring through the secondary sources of information available in both the public domain and paid sources. At Infinium Global Research, each research study is based on over 500 hours of secondary research accompanied by primary research. The information obtained through the secondary sources is validated through the crosscheck on various data sources.

The secondary sources of the data typically include

1. Company reports and publications
2. Government/institutional publications
3. Trade and associations journals
4. Databases such as WTO, OECD, World Bank, and among others.
5. Websites and publications by research agencies

Segment Covered

The global 23 valent pneumococcal polysaccharide vaccine market is segmented on the basis of type, age group, and distribution channel.

The Global 23 Valent Pneumococcal Polysaccharide Vaccine Market by Type

- Pre-filled Syringe
- Single Dose Vial

The Global 23 Valent Pneumococcal Polysaccharide Vaccine Market by Age Group

- 2-10 Years
- 10-64 Years
- 64+ Years

The Global 23 Valent Pneumococcal Polysaccharide Vaccine Market by Distribution Channel

- Hospitals
- Clinics
- Others

Company Profiles

The companies covered in the report include

- Merck & Co., Inc.
