**Report description:**

Baked goods is expected to register double-digit current value growth in 2023, though volume growth is expected to be much more moderate, as inflation still remains an issue. Though there was a decrease in the price of flour, as supplies from Russia increased and with the Russian rouble also depreciated, these prices did not feed into lower prices for baked goods. Continuing population growth is expected to support a moderate volume increase.

Euromonitor International's Baked Goods in Kazakhstan report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2018-2022, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
