Report description:

Sales of juice have been negatively impacted by the impact of inflation on the cost of living and by the gloomy economy with growth through both the on-trade and off-trade channels slowing in volume terms in 2023 as people have been forced to save money. Nonetheless, despite these financial pressures sales of juice have continued to grow in on- and off-trade volume terms in 2023, which is in part due to the rising health and wellness trend and a drop in alcohol consumption.
