### **Report description:**

#### **KEY FINDINGS**

The India airport moving walkway systems market is estimated to record a CAGR of 4.99% during the forecast period, 2024-2032. One of the significant factors is the rise in air travel due to economic growth and globalization.

#### **MARKET INSIGHTS**

The rise in global tourism, increasing business travel, and the expansion of airline networks have contributed significantly to the demand for efficient passenger mobility solutions. Airports, in response to these trends, are investing in infrastructure upgrades, including the installation of moving walkway systems, to meet the rising expectations of passengers and to manage the increasing footfall efficiently. Ongoing construction projects in India's airport sector further highlight the future demand for moving walkway systems. The involvement of companies specializing in transportation solutions, such as Thyssenkrupp, Kone, and Schindler, reflects the industry's commitment to providing state-of-the-art infrastructure. These companies play a pivotal role in integrating moving walkway systems seamlessly into the airport structures, contributing to enhanced passenger mobility and overall efficiency.

In conclusion, the market overview of airport moving walkway systems in India depicts a trajectory of sustained growth, driven by the intersection of urbanization, government initiatives, and ambitious airport expansion plans. As India continues to invest in its aviation infrastructure, the demand for advanced passenger transportation solutions is expected to remain robust, positioning airport moving walkway systems as crucial components of the country's evolving travel landscape. Hence, these factors are set to drive the airport moving walkway systems market growth in India during the forecast period.
