- 2-5 Users License \$6600.00
- Site License \$7920.00
- Enterprise License \$9504.00

Report description:

Description

Report Scope:

This report explains critical trends in the vaccine industry. It discusses the market determinants, which act as motivating or restraining factors and provides insights to stakeholders and potential entrants.

This report includes only human vaccines; animal vaccines have not been considered in this report.

This study looks at research and development (R&D) spending, increasing competition and new technologies, which are giving direction to the market. These advancements, new product launches and changing lifestyles are influencing future market growth.

Company mergers, acquisition strategies and collaborations are also covered in this report. Additionally, this study discusses the strengths and weaknesses of each strategy type, considering new technologies, growing competition and changing customer needs.

The market has been analyzed based on the application of current vaccines. Categories considered in this report include pneumococcal vaccines; diphtheria, tetanus vaccines; HPV vaccines; MMR vaccines; and other vaccines including rotavirus vaccines, influenza vaccines, hepatitis B vaccines, chickenpox vaccines, polio vaccines, BCG, and yellow fever vaccines.

This study details market growth among vaccine manufacturers and end users. Genomic research centers, academic institutions, government and private laboratories, various hospital settings, and pharmaceutical, diagnostic and biotechnology companies and physicians will find this study to be of interest.

This report provides useful information to all market players, potential entrants, government agencies and other interested parties. As the report covers geographic regions in detail, companies interested in expanding geographic reach will also find this study useful.

Report Includes:

- 34 data tables and 63 additional tables
- An up-to-date overview of the global markets for vaccine technologies
- Analyses of the global market trends, with historical market revenue data (sales figures) from 2020 to 2022, estimates for 2023, and projections of compound annual growth rates (CAGRs) through 2028
- Estimate of the market size and revenue forecast for the global market, and a corresponding market share analysis based on technology, disease indication, age group and region
- Facts and figures pertaining to the market drivers, opportunities and challenges, emerging technologies, global R&D spending, and the regulatory landscape
- Assessment of present and future strategies in the innovation-driven vaccine technologies market, and a look at the vaccines for humans and their immunization schedule
- Discussion of the importance of ESG in the market for vaccine technologies, including consumer attitudes, the impact of ESG factors on company performance, and ESG practices of leading companies
- Review of patents and patent applications
- Overview of the major vendors, along with an analysis of the industry structure, including company market shares, recent M&A activity, and venture funding
- Analysis of the competitive landscape based on recent developments and segmental revenues
- Profiles of the leading companies

Executive Summary

Summary:

The global market for vaccine technologies was worth \$REDACTED billion in 2022. The market is expected to grow at a compound annual growth rate (CAGR) of REDACTED% to reach \$REDACTED billion through 2028. Growth in the vaccine market is anticipated on the basis of technological advancements. Advancements will occur in regard to the development of novel vaccines towards emerging infectious diseases, cancers and allergies. Continuous improvements in vaccine design, delivery technologies and manufacturing will also boost market growth.

The global vaccine technologies market is segmented in this report by technology, disease, age, and region.

Table of Contents:

- Table of Contents
- Chapter 1 Introduction
- Study Background
- Study Goals and Objectives
- Reasons for Doing this Study
- Scope of Report
- What's New in This Update?
- Methodology
- Information Sources
- Geographic Breakdown

www.scotts-international.com

Segmentation Breakdown
Chapter 2 Summary and Highlights
Market Outlook
Market Insights
Chapter 3 Market and Technology Background
Definitions
Immune System and Vaccines
Components of the Immune System
Cells of the Immune System
Immune Response
Major Histocompatibility Complex (MHC)
Immunization and Vaccines
Disorders of the Immune System
Impact of Lifestyle on the Immune System
How Vaccines Work
Principles of Immunization
Types of Immunity
Advantages of Vaccination
History of Vaccines
Vaccines and Immunization, Overview
Types of Vaccines
Attenuated (Live) Vaccines
Inactivated (Killed) Vaccines
Toxoid Vaccines
Subunit Vaccines
Conjugate Vaccines
Recombinant Vector Vaccines
DNA Vaccines
RNA Vaccines
Immunization
Advantages of Immunization
Adjuvants and Excipients
Pathogen Components
Particulate Adjuvants
Infectious Diseases Preventable by Vaccine
Human Diseases
Viral Diseases
Bacterial Diseases
Regulatory Aspects
World Health Organization (WHO) Prequalified Vaccines
New Product Approvals
Recalls
Significant Regulatory Developments in Vaccines
Chapter 4 Market Dynamics
Overview
Market Drivers
Growing Awareness of Immunization

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

Growing Investments and R&D
New Vaccines
Prevalence of Infectious Diseases
Market Restraints
Vaccine Development and Pricing
Market Opportunities
Increased Demand from Emerging Markets
Therapeutic Vaccines
Chapter 5 Global Market for COVID-19 Vaccines
Overview
COVID-19 Vaccine Technologies
Advent of mRNA Technology
Impact of COVID-19 on Routine Infant Vaccination
COVID-19 Disruptions
Stagnating Global Coverage Rate
Progress and Challenges by Country and Region
Chapter 6 Market Breakdown by Technology
Global Market for Vaccine Technologies by Technology
Subunit, Recombinant, Polysaccharide, and Conjugate Vaccines
Live-Attenuated Vaccines
Inactivated Vaccines
Toxoid Vaccines
Other/Combination Vaccines
Chapter 7 Market Breakdown by Disease
Global Market for Vaccine Technologies by Disease
Pneumococcal
Diphtheria and Tetanus
HPV
MMR
Others
Chapter 8 Market Breakdown by Age Group
Global Market for Vaccine Technologies by Age Group Treated
Pediatrics
Adolescents and Adults
Chapter 9 Market Breakdown by Region
Global Market for Vaccine Technologies by Region
North America
Europe
Asia-Pacific
Rest of the World
Chapter 10 Emerging Technologies and Developments
Developments
mRNA Vaccines
Viral Vector Vaccines
Nanoparticle Vaccines
DNA Vaccines
Virus-Like Particle (VLP) Vaccines
