Report description:

The Indian onion powder market size reached 14.8 Kilo Tons in 2023. Looking forward, IMARC Group expects the market to reach 23.4 Kilo Tons by 2032, exhibiting a growth rate (CAGR) of 5% during 2024-2032.

Onion powder is prepared commercially using raw onions by dehydrating, freeze-drying, vacuum-shelf drying and flow drying. It comprises of many vital nutrients like carbohydrate, fiber, protein, cholesterol, vitamin B-6 and C, manganese, calcium, iron, folate, potassium, phosphorus and magnesium. In addition to this, onion powder is less pungent in taste but its concentrated disposition makes it last for a prolonged time span. Onion powder is widely used in India for several culinary purposes owing to its advantages such as long-shelf life, easy transportation, wide availability and insignificant calorie count.

On account of rapid urbanisation, hectic schedules and rising working population, the demand for onion powder is witnessing a tremendous growth, particularly in India. In order to save time, consumers are not willing to indulge in difficult cooking procedures such as chopping onions. Apart from this, food processing represents one of the largest sectors in India which is bolstering the demand for onion powder. Moreover, onion powder is used in ready-to-eat food products, like packaged soups, sauces, oats, noodles, pasta, frozen food and instant mixes. Further, onion powder is used in seasonings, dry rubs, marinades and condiments for preparing appetisers, seafood and meat.
