Report description:

The U.S. sleep disorder clinics market was valued at USD 6.11 billion in 2023 and is expected to grow at a CAGR of 5.51% from 2023 to 2029.

MARKET DRIVERS

Rising Prevalence of Sleep Disorders: A study by the American Sleep Apnea Association found substantial increases in sleep disorders over the study period, including a 41% rise in obstructive sleep apnea. Other disorders also surged: narcolepsy by 14%, hypersomnia by 32%, periodic limb movement disorder by 30%, and REM sleep behavior disorder by 64%. The data suggests a potential rise in other disorders. Approximately 50-70 million Americans have sleep disorders, and around 84 million don't get the recommended uninterrupted sleep for health protection.

Rising Healthcare Collaborations: Different organizations form "collaborative working" partnerships, which can take various forms, from informal networks to complete mergers. With 50-70 million Americans experiencing sleep disorders, this poses a burgeoning opportunity for the medical and dental communities. As public awareness of sleep's crucial role in health grows, physicians and dentists can anticipate a rise in patients seeking remedies. The demand for clear standards and best practices in diagnosing and treating sleep disorders has become more evident.

Rising Elderly Population: Younger adults (18-44) face fewer sleep issues (13.8%) than those aged 45-64 (21.8%) and 65+ (20.3%). The U.S. older population, at 55.8 million or 16.8% in 2020, is rapidly growing due to aging baby boomers. As seniors require assistance, there's a rising concern for diabetes incidence, providing senior living facilities a chance to tap into the fastest-growing U.S. market.

U.S. SLEEP DISORDER CLINICS MARKET HIGHLIGHTS:

-[According to the National Council on Aging (NCOA), approximately 39 million U.S. adults have obstructive sleep apnea (OSA), and

936 million adults around the world are estimated to have mild to severe OSA.

-[The U.S. sleep disorder clinics market by ownership is segmented into affiliated and independent clinics. Independent clinics are the fastest-growing segment, with a CAGR of 6.05% during the forecast period. This segment's growth is due to flexibility in providing services and personalized care, resulting in patients' shift from hospitals to independent clinics.

- The sleep testing application segment accounted for the largest U.S. sleep disorder clinics market share. With the need to diagnose sleep apnea in the comfort of their own homes, patients are increasingly using home sleep testing equipment, thus resulting in the growth of the segment.

- The private health insurance segment by payor dominated the U.S. sleep disorder clinics market share with over 50%. U.S. medical care is expensive, so most people appreciate health insurance, and private health insurance coverage continues to be more prevalent, making most Americans use private health insurance to cover their medical expenses.

REGIONAL ANALYSIS

The east region held the most significant share of the U.S. sleep disorder clinics market, accounting for over 33% in 2023. This region consists of states including Connecticut, Delaware, Maine, Maryland, Massachusetts, New York, New Jersey, New Hampshire, Pennsylvania, Rhode Island, and Vermont. New York and Pennsylvania are among the top 10 sleep-deprived states in the U.S. and provide significant opportunities for vendors to explore. In 2020, the age-adjusted prevalence of adults not getting enough sleep was 34.8% in the U.S., meaning 1 in 3 adults got fewer than seven hours in an average 24-hour period.

VENDOR LANDSCAPE

The U.S. sleep disorder clinics market report contains exclusive data on 29 vendors. Star Sleep & Wellness Center, SleepWorks, and Comprehensive Sleep Care are some leading players currently dominating the U.S. sleep disorder clinics market. The U.S. sleep disorder clinic market is characterized by rapid technological changes, a surge in the prevalence of sleep disorders, a rise in awareness of sleep disorders, and insurance coverage standards. Most vendors in the market have been focusing on initiatives to enhance their solutions with new technologies and develop new services to broaden their consumer base.
