Report description:

The Asia-Pacific C4ISR Market size is estimated at USD 3.80 billion in 2024, and is expected to reach USD 4.68 billion by 2029, growing at a CAGR of 4.19% during the forecast period (2024-2029).

Advancements and developments in the field of battlefield management for obtaining better tactical communications and improving the effectiveness of surveillance and reconnaissance missions are driving the Asia-Pacific C4ISR market.

The growing demand for the development of electronic warfare by countries, such as China, India, and Japan, is expected to generate more demand for the C4ISR market.

The growing use of Artificial Intelligence is also influencing the growth of the market. The complexity of the current C4ISR environment and the high amount of the generated data have given rise to the need for automated systems that can ingest data at high volume, process it with low latency, and derive actionable intelligence.

Asia-Pacific C4ISR Market Trends

Increasing Investments to Enhance the Space-based C4ISR Capabilities in Asia-Pacific

With the emergence of several space-based systems that can replace the traditional C4ISR architecture, several countries are allocating substantial resources to such programs in their defense spending plans. Space-based C4ISR capabilities have become important for the global armed forces, as they offer a technological edge over adversaries. The advent of small satellites that offer the same performance as traditional satellites while contributing to cost savings is driving investments into space-based C4ISR

systems. In addition, the advent of pseudo-high-altitude satellites (HAPS), which incorporates the best aspects of terrestrial and satellite-based communication systems, bridged the gap between drones and satellites in terms of coverage and cost. For instance, in February 2021, India's Hindustan Aeronautics Limited (HAL) announced the development of a futuristic high-altitude pseudo satellite with a local start-up company to enhance the C4ISR capabilities of the Indian armed forces. Such developments are expected to augment the prospects of the Space-based C4ISR segment during the forecast period.

China to Experience the Highest CAGR during the Forecast Period

China is expected to dominate the market throughout the forecast period, due to the developments of manned and unmanned aircraft, reconnaissance satellites, and sophisticated ground-based infrastructure that are deployed into China's emerging network-centric military. China is the highest military spender in the Asia-Pacific region and the country has allocated significant resources to improve space-related R&D and launch infrastructure. Additionally, the country is involved in the development of advanced UAVs, like the Wing Loong ID UAV, which is designed for missions, like intelligence, surveillance, reconnaissance (ISR), border patrol, counter-terrorism, and anti-smuggling. China developed its AEWC&C system, KJ-2000. The KJ-2000 has indigenously produced phased array radar capable of tracking sixty to one hundred aerial targets simultaneously at up to four hundred and seventy kilometers. China is also investing heavily in space-based C4ISR capabilities. In the past few years, there has been a significant advancement in China's C4ISR-related space development programs, like the Beidou-2 satellite series. China has also modernized and expanded its space launch infrastructure to facilitate space C4ISR programs. Such developments are expected to propel the market growth of the country during the forecast period.

Asia-Pacific C4ISR Industry Overview

The Asia-Pacific C4ISR Market is fragmented, with many international and regional players supporting the armed forces. The prominent international players in the market studied are Lockheed Martin Corporation, THALES, Raytheon Technologies Corporation, BAE Systems plc, and General Dynamics Corporation. However, due to the growth of indigenous development of arms, military equipment, and manned and unmanned vehicles, countries, such as China and India, are supporting the local players, including AVIC and DRDO, to develop advanced military technologies that can support the armed forces.

Additional Benefits:

- The market estimate (ME) sheet in Excel format
- 3 months of analyst support

Table of Contents:

1 INTRODUCTION

1.1 Study Assumptions

1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

4.1 Market Overview

4.2 Market Drivers

4.3 Market Restraints

4.4 Porter's Five Forces Analysis

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 4.4.1 Threat of New Entrants
- 4.4.2 Bargaining Power of Buyers/Consumers
- 4.4.3 Bargaining Power of Suppliers
- 4.4.4 Threat of Substitute Products
- 4.4.5 Intensity of Competitive Rivalry

5 MARKET SEGMENTATION

5.1 By Platform

- 5.1.1 Air
- 5.1.2 Land
- 5.1.3 Sea
- 5.1.4 Space

5.2 Country

- 5.2.1 China
- 5.2.2 India
- 5.2.3 Japan
- 5.2.4 South Korea
- 5.2.5 Australia
- 5.2.6 Rest of Asia-Pacific

6 COMPETITIVE LANDSCAPE

6.1 Vendor Market Share

6.2 Company Profiles

- 6.2.1 Lockheed Martin Corporation
- 6.2.2 Northrop Grumman Corporation
- 6.2.3 Elbit Systems Ltd.
- 6.2.4 THALES
- 6.2.5 Raytheon Technologies Corporation
- 6.2.6 L3Harris Technologies, Inc.
- 6.2.7 Saab AB
- 6.2.8 General Atomics
- 6.2.9 General Dynamics Corporation
- 6.2.10 BAE Systems plc
- 6.2.11 Israel Aerospace Industries Limited

7 MARKET OPPORTUNITIES AND FUTURE TRENDS
