- Team License (1-7 Users) \$5250.00
- Site License \$6500.00
- Corporate License \$8750.00

### **Report description:**

The Brazil Seed Treatment Market size is estimated at USD 541.81 billion in 2024, and is expected to reach USD 837.48 billion by 2029, growing at a CAGR of 9.10% during the forecast period (2024-2029).

The major driving factors for the market are the increasing adoption rate of genetically engineered seeds in the country and the rising production level of quality soybean for domestic consumption (human and livestock) and the export market. These factors boosted the seed treatment market in Brazil in the past few years.

The market share analysis of the study concluded that the market was consolidated with a few international players occupying a major portion of the market through a diverse product portfolio. Some of the major players in the Brazilian seed treatment industry include Syngenta, Bayer CropScience, BASF SE, Corteva Agriscience, Advanced Biological Marketing, and Nufarm Limited, among others.

### **Brazil Seed Treatment Market Trends**

#### **Rising Adoption of GM Seeds**

Brazil, one of the largest food baskets in the world, has registered a steep rise in the adoption of genetically modified crops, with the total area under transgenic crops amounting to 50.2 million hectares in 2017, as revealed in a study by International Service for the Acquisition of Agri-biotech Applications (ISAAA). Cotton, soybean, and corn are the major biotech crops prevalent in Brazil. The area under GM crops further rose by 1.1 million hectares in 2018, thereby, leaving a wider scope for the seed treatment market to capture potential space in the expansion in treating seeds on a massive scale. For instance, Bayer would reportedly

launch the INTACTA 2 XTEND seed technology, which allows the genetically modified soybeans to be treated with dicamba without being harmed, in Brazil during the 2021-2022 cropping season. As a result, the surging area under genetically engineered seeds in Brazil is anticipated to lead to rapid penetration of seed treatment products, thereby, driving the market, during the forecast period.

### Increasing Production of Soybean

The production of Soybean, one of the largest growing crops in Brazil, increased immensely from 86,760.5 thousand metric tons in 2014 to 117,887.6 thousand metric tons in 2018. The area harvested also increased by 12% from 30,273.7 thousand hectares in 2014 to 34,771.6 thousand hectares in 2018. Further, a competitive Real driven by the devaluation of the currency against the US Dollar, is expected to boost soybean prices by almost 10% in the export market, further encouraging farmers to raise the level of production in the country. Moreover, a growing need for high-quality domestic ingredients for livestock feed in the country is anticipated to play a vital role in driving soybean production. These factors are expected to be beneficial for the growth of the seed treatment industry in the future. Owing to the demand, BASF launched Bomvoro, an efficient solution for the treatment of soybean seeds, in Brazil, in 2018.

### Brazil Seed Treatment Industry Overview

The market for seed treatment in Brazil is consolidated, with a few global players leading the market with a highly diversified product portfolio and several acquisitions and agreements taking place for gaining the major share in the industry. Some of the major players in the Brazilian seed treatment industry include Syngenta, Bayer CropScience, BASF SE, Corteva Agriscience, Advanced Biological Marketing, Nufarm Limited, and Valent Biosciences Corporation, among others. The emergence of various agreementR&D us, followed by acquisitions and R&D investments in the biological research divisions in the expanding marketplace, are the most adopted strategies of the market leaders. For instance, in July 2017, Bayer, in partnership with Novozymes, launched two on-farm seed treatments, inoculant Biagro 10 and Biagro Liquido NG, in Brazil. Ihara launched Certeza-N in Brazil in April 2019, the first fungicidal seed treatment products for controlling nematodes.

- 4.4.1 Threat of New Entrants
- 4.4.2 Bargaining Power of Buyers/Consumers
- 4.4.3 Bargaining Power of Suppliers
- 4.4.4 Threat of Substitute Products
- 4.4.5 Intensity of Competitive Rivalry

## 5 MARKET SEGMENTATION

- 5.1 Application
  - 5.1.1 Insecticide
  - 5.1.2 Fungicide
  - 5.1.3 Other Applications
- 5.2 Crop Type
  - 5.2.1 Corn/Maize
  - 5.2.2 Soybean
  - 5.2.3 Wheat
  - 5.2.4 Rice
  - 5.2.5 Canola
  - 5.2.6 Cotton
  - 5.2.7 Others

## 6 COMPETITIVE LANDSCAPE

- 6.1 Most Adopted Strategies
- 6.2 Market Share Analysis
- 6.3 Company Profiles
  - 6.3.1 Syngenta
  - 6.3.2 Bayer CropScience AG
  - 6.3.3 BASF SE
  - 6.3.4 Corteva Agriscience
  - 6.3.5 Advanced Biological Marketing
  - 6.3.6 Nufarm Limited
  - 6.3.7 Valent Biosciences Corporation
  - 6.3.8 Verdesian Life Sciences
  - 6.3.9 FMC Corporation
  - 6.3.10 LANXESS
  - 6.3.11 IHARA
