Report description:

The Dehumidifier Market size is estimated at USD 2.30 billion in 2024, and is expected to reach USD 2.71 billion by 2029, growing at a CAGR of 3.27% during the forecast period (2024-2029).

A dehumidifier removes moisture or water content from the air and helps in combating extreme temperatures. Increasing health awareness and high humid coastal places are leading to the demand for such products. As humid air leads to fast decay of food they are also accepted in hotels, restaurants, and cold storage food. there is an increase in research and development regarding the usage of dehumidifiers by the vendors in the market which is anticipated to fuel the market growth.

Players are focusing on building energy-efficient dehumidifier. Smart dehumidifiers that work with technology and calculates humidity levels for the air and also work automatically are gaining traction in the market. Cloud-based technology that allows the connection of dehumidifier to smartphones, tablets, and laptops is anticipated to accelerate the growth in the market. there is a growing demand of portable dehumidifiers from the residential and commercial spaces which will further escalate the demand in the market. New innovations such as solar-assisted, liquid desiccant dehumidifiers that enhance sustainability and energy expected to grow the market.

Dehumidifier Market Trends

Chemical Dehumidifier Segment Accounts for Highest Market Share

The chemical dehumidifier uses drying substances to remove moisture from the air, these materials are also known as desiccant material. They are widely accepted among industries for bringing required humidity levels in the environment. It is also one of the
