### **Report description:**

The Germany Automotive Engine Oils Market size is estimated at 276.40 Million Liters in 2024, and is expected to reach 283.58 Million Liters by 2026, growing at a CAGR of 1.29% during the forecast period (2024-2026).

#### Key Highlights

- Largest Segment by Vehicle Type - Passenger Vehicles : In Germany, the highest share of passenger vehicle population, in turn, has attributed to the highest engine oil consumption level in the passenger vehicles sector.
- Fastest Segment by Vehicle Type - Motorcycles : The meteoric increase in the demand for mopeds and scooters in Germany post the COVID-19 outbreak is likely to drive the engine oil consumption in the motorcycles segment.

#### Germany Automotive Engine Oil Market Trends

##### Largest Segment By Vehicle Type : Passenger Vehicles

- Engine oils are the most used automotive lubricants in the country. In 2021, they accounted for about 68.2% of the automotive lubricant consumption. High engine oil consumption by domestic car brands, like Volkswagen, BMW, and Audi, makes Germany one of the major engine oil consumers in Europe. However, during 2015-2020, automotive engine oil consumption in Germany dropped by a CAGR of about 0.8% due to the decline in average drain intervals and production output.
- In 2020, the COVID-19 outbreak resulted in a huge decline in the usage of Germany's existing vehicle fleet. Thus, engine oil consumption in the country decreased by around 3.3%.

- Despite the expected recovery in sales and production in the automotive industry, an increase in the penetration of electric vehicles is likely to have a negative impact on engine oil consumption over the next five years.
