In India, Forage seeds are primarily used by the dairy farmers and farmers producing forage for the animal feed firms. These seeds are produced according to the animal species to be fed. The huge cattle industry, poultry industry and other animal industries in the country are the prime drivers of the market. The demand from the feed manufacturing companies is also accelerating the forage seeds market.

India Forage Seed Market Trends

Growing Demand for Dairy and Meat Products Drives the Market

The Indian food economy is being increasingly driven by the shift in diet and food consumption patterns toward livestock products. The demand for meat has been growing at a faster rate in India because of sustained economic growth, rising per capita income, and increasing awareness of the nutritive value of meat and meat products. Animal production for meat and dairy has been significantly increasing in the last few years. For example, The country produced 801 million heads of Chicken in 2018 which was 18 million more than the previous year. The growth in animal production for meat and dairy requirements is likely to create a demand for better forage crops,
