Report description:

The Modular Construction Market size is estimated at USD 63.76 billion in 2024, and is expected to reach USD 97.13 billion by 2029, growing at a CAGR of 8.78% during the forecast period (2024-2029).

The sporadic outbreak of the COVID-19 pandemic in 2020 and the first half of 2021 drastically curtailed the construction sector due to imposed government bans and restrictions, thereby limiting the growth of the modular construction market. However, the sector has been recovering well since restrictions were lifted. An increase in house sales, new project launches, and increasing demand for new offices and commercial spaces have been leading the market recovery over the last two years.

Key Highlights

- Rising demand from construction industries in countries of Asia-Pacific and the time and cost-effectiveness of modular construction work with lower defects and reworks needed are expected to drive the market's growth.
- On the flip side, the high cost of logistics involved in modular construction is expected to hinder the growth of the market studied.
- The construction industry has been exploring innovative materials and technologies that can provide more high-quality housing using less construction time. The implementation of building information modeling (BIM) and potential savings in cost due to the adoption of modular construction will likely provide new growth opportunities for the market.
- Asia-Pacific dominated the market across the world, with the largest consumption from countries, such as Japan, China, and South Korea.

Modular Construction Market Trends

Increasing Demand from the Industrial/Institutional Sector

- The industrial/institutional sector is the largest segment in the modular construction market. Institutional buildings are constructed using the modular construction process in accordance with the International Building Code (IBC) or a version of a code modeled after the IBC and state regulations.
- The increasing demand for modular construction in Asia-Pacific is moving much of the construction process from the building site into factories. "While countries like China, Japan, Singapore, and Australia are increasingly adopting modular buildings to meet labor and housing shortages, increase in industrialization, rising urbanized population, rising demand for eco-friendly and sustainable construction and government support."
- Government initiatives to reduce waste and promote green construction and building techniques are driving the demand for modular construction. For example, Singapore has mandated elements of prefabricated, pre-finished, and volumetric construction (PPVC) for all the projects on the government's land. This is backed by subsidies for companies that participate with the aim of increasing and standardizing modern methods of construction (MMC) in the country, thereby increasing the demand for off-site construction.
- According to the National Bureau of Statistics of China, the country's construction output peaked in 2022 at about CNY 31.20 (~USD 4.61 trillion). Thereby supporting the market demand.
- According to EU Industrial R&D Investment Scoreboard, Europe's industrial sector is back on track in research and development investments with an increase of 8.9% in 2021 compared to the -2.2 % pandemic-related dip in 2020.
- Globally, the private sector R&D investment in industrial construction grew strongly beyond pre-pandemic levels by 14.8% in 2021 (compared to 2020).
- According to the American Institute of Architects, in the United States, spending in education space, which declined by an estimated -6.6% in 2021, is expected to rise by 2.7% in 2022. Spending in health facilities rose by an estimated 1.2% in 2021, and it is expected to rise by 2.4% in 2022.
- According to the European Investment Bank Group, the bank provided EUR 99 million (~USD 105.48 million) loan to Hemso Fastighets AB to create more energy-efficient social infrastructure in Sweden and Finland. Nine buildings for social services will be built, including nursing homes, a medical facility, preschools, and school services.
- Therefore, the above factors are expected to have a significant impact on the market in the coming years.

Asia-Pacific Region to Dominate the Market

- The Asia-Pacific region stands to be the largest and fastest-growing market for the construction industry. Factors, such as expansion in the residential and commercial construction sector, will drive market growth in the region.
- Further, rising investments in infrastructural construction projects in the private and public sectors in developing countries, such as India and China, have proliferated the growth of the Asia-Pacific modular construction market.
- The rising household income levels, combined with the population migrating from rural to urban areas, are expected to continue to drive the demand in the residential construction sector in the region. The increased focus on affordable housing by both the public and private sectors is driving the growth in the residential construction sector.
- Non-residential infrastructure is expected to grow considerably. The aging population in the country is creating a demand for the construction of healthcare facilities and new hospitals. The structural changes in the Chinese economy over the past few years, with the service sector taking a larger share of the total GDP, are giving rise to the construction of huge commercial and office spaces.
- China has the largest construction market in the world, encompassing 20% of all construction investments globally. China is expected to spend nearly USD 13 trillion on buildings by 2030, creating a positive market outlook for the modular construction market.

- India plans to spend USD 1.4 trillion on infrastructure through the 'National Infrastructure Pipeline' in the next five years, as reported in 2022. In FY21, infrastructure activities accounted for a 13% share of the total FDI inflows of USD 81.72 billion.
- According to Singapore's Central Bank, the country is planning on investing over USD 2.7 billion in infrastructure and housing projects. The government announced that the public sector will be issuing up to SGD 35 billion (~USD25.3 billion) of green bonds to finance sustainable infrastructure projects by 2030.
- Thus, the factors mentioned above are expected to boost the demand for the modular construction market in the region in the coming years.

Modular Construction Industry Overview

The modular construction market is highly fragmented in nature. The major players in the studied market (not in any particular order) include Skanska, Bouygues Construction, WillScot Mobile Mini Holdings Corp., ATCO Ltd, and SEKISUI CHEMICAL CO., LTD, among others.

- 3 months of analyst support

Table of Contents:

1 INTRODUCTION

- 1.1 Study Assumptions
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

4.1 Drivers

- 4.1.1 Increasing Demand from the Construction Industries in Asia-Pacific Countries
- 4.1.2 Time and Cost-effective Method of Construction
- 4.1.3 Lower Defects and Rework
- 4.1.4 Dynamics of labor demand
- 4.1.5 Other Drivers

4.2 Restraints

- 4.2.1 High Cost of Logistics
- 4.2.2 Other Restraints

4.3 Industry Value Chain Analysis

4.4 Porter's Five Forces Analysis

- 4.4.1 Bargaining Power of Suppliers
- 4.4.2 Bargaining Power of Buyers
- 4.4.3 Threat of New Entrants
- 4.4.4 Threat of Substitute Products and Services
- 4.4.5 Degree of Competition

4.5 Production Process

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

4.6 Regulatory Policy Analysis

5 MARKET SEGMENTATION (Market Size in Value)

5.1 Construction

5.1.1 Permanent Modular

5.1.2 Relocatable Modular

5.2 Material

5.2.1 Steel

5.2.2 Concrete

5.2.3 Wood

5.2.4 Plastic

5.3 End-user Industry

5.3.1 Commercial

5.3.2 Industrial/Institutional

5.3.3 Residential

5.4 Geography

5.4.1 Asia-Pacific

5.4.1.1 China

5.4.1.2 India

5.4.1.3 Japan

5.4.1.4 South Korea

5.4.1.5 Rest of Asia-Pacific

5.4.2 North America

5.4.2.1 United States

5.4.2.2 Canada

5.4.2.3 Mexico

5.4.3 Europe

5.4.3.1 Germany

5.4.3.2 United Kingdom

5.4.3.3 France

5.4.3.4 Italy

5.4.3.5 Benelux Countries

5.4.3.6 Rest of Europe

5.4.4 South America

5.4.4.1 Brazil

5.4.4.2 Argentina

5.4.4.3 Rest of South America

5.4.5 Middle-East and Africa

5.4.5.1 Saudi Arabia

5.4.5.2 South Africa

5.4.5.3 Rest of Middle-East and Africa

6 COMPETITIVE LANDSCAPE

6.1 Mergers and Acquisitions, Joint Ventures, Colaborations, and Agreements

6.2 Market Share (%)**/Ranking Analysis

6.3 Strategies Adopted by Leading Players

6.4 Company Profiles

Scotts International. EU Vat number: PL 6772247784

- 6.4.1 ACS Group
- 6.4.2 ATCO Ltd
- 6.4.3 Balfour Beatty
- 6.4.4 Bechtel Corporation
- 6.4.5 Bouygues Construction
- 6.4.6 Fluor Corporation
- 6.4.7 Guerdon, LLC
- 6.4.8 JL Construction
- 6.4.9 Julius Berger Nigeria PLC
- 6.4.10 Kiewit Corporation
- 6.4.11 Laing O'Rourke
- 6.4.12 Larsen & Toubro Limited
- 6.4.13 McGRATH RENTCORP
- 6.4.14 Palomar Modular Buildings
- 6.4.15 Red Sea Housing Services
- 6.4.16 SEKISUI CHEMICAL CO. LTD
- 6.4.17 Skanska
- 6.4.18 System House R & C Co. Ltd
- 6.4.19 Taisei Corporation
- 6.4.20 WillScot Mobile Mini Holdings Corp

7 MARKET OPPORTUNITIES AND FUTURE TRENDS

- 7.1 Implementation of Building Information Modeling (BIM)
- 7.2 Potential Savings in Cost Due to the Adoption of Modular Construction
