### **Report description:**

The Spain Automotive Engine Oils Market size is estimated at 132.55 Million Liters in 2024, and is expected to reach 138.11 Million Liters by 2026, growing at a CAGR of 2.08% during the forecast period (2024-2026).

#### Key Highlights

- Largest Segment by Vehicle Type - Commercial Vehicles : In Spain, the large engine sizes of commercial vehicles (CV)s have led to higher engine oil volumes. Thus, CVs form the major lubricant-consuming vehicle type in the country.
- Fastest Segment by Vehicle Type - Passenger Vehicles : The increasing need to travel, adhering to social distancing norms, is likely to boost motorcycle sales since 2021, in turn, boosting engine oil consumption in Spain.

#### Spain Automotive Engine Oils Market Trends

##### Largest Segment By Vehicle Type : Commercial Vehicles

- Prior to 2020, passenger vehicles accounted for the largest share of the automotive lubricant consumption volume among all vehicle types. In Spain, the demand for automotive engine oils increased at a CAGR of 2.14% during 2015-2019.
- In 2020, the COVID-19 outbreak resulted in a major decline in the usage of the existing vehicle fleets in the country, in turn causing a drop in engine oil consumption levels at a rate of 12.50%, compared to 2019.
- During 2021-2026, engine oil consumption is estimated to grow at a lower rate of 2.15%, as compared to other product types. The primary reason for the lower growth rate is engine downsizing, which is further decreasing the average engine oil volumes.

Also, an increase in service intervals in the PV and CV segments due to the rising adoption of synthetic lubricants is expected to restrain the volume growth of engine oils in the coming years.
