### **Report description:**

The United States Automotive Engine Oils Market size is estimated at 2.92 Billion Liters in 2024, and is expected to reach 2.97 Billion Liters by 2026, growing at a CAGR of 0.85% during the forecast period (2024-2026).

#### Key Highlights

- Largest Segment by Vehicle Type - Passenger Vehicles : The highest proportion of passenger vehicle population in the United States is attributed to the highest engine oil consumption in the passenger vehicles segment.
- Fastest Segment by Vehicle Type - Passenger Vehicles : As the social distancing measures are being slowly eased in the country, the usage of passenger vehicles is likely to increase, thereby boosting their engine oil consumption.

#### US Automotive Engine Oils Market Trends

##### Largest Segment By Vehicle Type : Passenger Vehicles

- During 2015-2020, the engine oil consumption in the country witnessed a fluctuating trend and recorded a negative CAGR of 3.95%.
- Most of the engine oils used in the United States meet the latest standards set by the International Lubricant Specification Advisory Committee (ILSAC) and the American Petroleum Institute (API). Although these synthetic grades have higher profit margins per gallon, they also support higher drain intervals. Hence, higher penetration of synthetic engine oils significantly restrained the growth of this product type, in terms of volume, during 2015-2020.
