### **Report description:**

The United States Home Office Furniture Market size is estimated at USD 6.15 billion in 2024, and is expected to reach USD 7.60 billion by 2029, growing at a CAGR of 4.35% during the forecast period (2024-2029).

Home Office Furniture plays an important role in today's family and works environment. They serve a variety of purposes, such as kids doing school projects, families working on a home budget or researching online, and people working from home in the office. The rise in the number of people working from home /remote places is driving the demand for home office furniture's category for various retailers and manufacturers alike. Smart, comfortable, and flexible furniture design are attracting customers with easy and fast delivery options. Ergonomics in furniture with multiple functions and designs that blend well with interiors are some of the trends in the market. Desks with innovations in technology such as adjustable sit and stand functions, wireless charging tables, chairs, and shelving units are major selling points. Workers not only need a comfortable place to relax as they work. They also need to have items that they can make any client feel at the office once in their homes. These are some of the reasons that home office furniture to see a growth in the forecast period.

US Home Office Furniture Market Trends

Seating Segment is Driving the Market

Office chairs are an integral part of the home office workspace and can be a matter of balancing style with the support features that make it more comfortable for sitting over a length of time. With employees spending more than 8-10 hours a day being occupied at work, proper seating becomes very crucial. Chairs must be built on scientific lines to avoid ill-health and fatigue as office chair greatly influences correct posture while at work and consequently influences health. In the United States, there is also

an increasing demand for ergonomic chairs which helps in enhancing the employee productivity, efficiency, and aesthetics of the workplace. American customers prefer to buy high-quality furniture which not just possess a great look and that is made up of high-quality materials.

## Ecommerce is Driving the Market

Increased penetration of the Internet and a rise in the use of smartphones and consumer banking systems have led to the growth of e-commerce. Therefore, most furniture manufacturers feel encouraged to sell their products online as e-commerce is gaining traction in the country. Manufacturers are offering their products through various leading e-commerce giants such as Amazon, Wayfair, and others. Also, the benefits of online stores such as low pricing and availability of a variety of products are believed to impetus the growth of home office furniture products through online stores.
