- In 2019, the end-user segment of the short-haul road freight transport market experienced a decline of 1.68% YoY in value. The oil and gas, mining, and quarrying segment of the short-haul road freight transport market experienced the highest decline of 12.91% YoY in value in 2019 due to privately held enterprises idling their drilling rigs in the United States, followed by the manufacturing segment of the short-haul road freight transport market with a decline of 2.47% due to decrease in the manufacturing output owing to weaker global demand.
- However, despite the impact of COVID-19, the end-user segment of the short-haul road freight transport witnessed a growth of 0.25% YoY in value in 2020. The agriculture, fishing, and forestry segment of the short-haul road freight transport market experienced the highest growth of 1.71% YoY in value, followed by the construction segment with a growth of 1.28% YoY in value. The growth in the agriculture, fishing, and forestry segment was due to increased demand for agricultural products globally, which resulted in increased production and exports of the goods. Whereas the manufacturing segment grew due to an increase in the value of residential construction by 4% in 2020.
- During the forecast period, the end-user segment of the short-haul road freight transport market estimated to register a CAGR of 4.41%, with the oil and gas, mining, and quarrying segment is estimated to register the highest CAGR of 8.38%, followed by the agriculture, fishing and forestry segment with a CAGR of over 5%. The oil and gas, mining, and quarrying segment is expected to grow as the US crude oil production is forecast to exceed pre-pandemic levels in 2023 due to a jump in shale output.
