Report description:

Bleach was heavily used during the initial stage of the pandemic as consumers prioritised the effectiveness of bleach as they sought to removal any possible COVID-19 infection on surfaces. The pandemic was officially declared over in Croatia on 11 May 2023 and this dampened volume sales of bleach despite a strong unit price decline as consumers have become relaxed about COVID-19 and there was not the same level of frenetic cleaning in order to remove any residue of the virus.

Euromonitor International's Bleach in Croatia market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth.
