Report description:

Bleach in Ukraine saw a continued decline in terms of volume sales in 2023, primarily because of the intensifying competition coming from the emergence and expansion of home care detergents incorporating disinfectant components with safer formulations than that of bleach. A growing emphasis on health and environmental considerations among consumers is steering them away from conventional bleach and towards alternatives that offer both efficacy and eco-friendliness in cleaning solutions...

Euromonitor International's Bleach in Ukraine market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues. Forecasts to 2028 illustrate how the market is set to change.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

- * Get a detailed picture of the Bleach market;
- * Pinpoint growth sectors and identify factors driving change;
- * Understand the competitive environment, the market's major players and leading brands;
- * Use five-year forecasts to assess how the market is predicted to develop.

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
