Report description:

Home insecticides saw retail volume declines in 2023 as local consumers were forced to prioritise purchases and cut down on less-essential products. Further, over 2022-23, North Macedonia saw a reduced number of flying and crawling insects, especially during the spring and early summer period when there was significant rainfall. Nonetheless, significantly rising unit prices and strong inflationary pressures contributed to strong single-digit current value growth for overall home insecticides in...

Euromonitor International's Home Insecticides in North Macedonia market report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, packaging innovations, economic/lifestyle influences, distribution or pricing issues.
