Report description:

Following two consecutive years of double-digit value growth, apparel and footwear specialists in Australia had to navigate a complex landscape in 2023. The year was marked by a series of challenges, most notably the cost-of-living crisis stemming from rising interest rates and increased energy bills. These factors squeezed local consumers' discretionary incomes, prompting a shift in spending priorities away from fashion.

Euromonitor International's Apparel and Footwear Specialists in Australia report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
