Report description:

Health and wellness staple foods saw a strong year in terms of value sales growth in 2022, with demand fuelled by a sharp rise in unit prices. Strong sales also came from categories like gluten-free and meat substitutes, as a growing number of Czech consumers are looking to lead healthier lifestyles in the post-pandemic period. This is reflected in the growing number of vegans and vegetarians, but also more importantly in the rising number of flexitarian consumers, who have been key to the growth...

Euromonitor International's HW Staple Foods in Czech Republic report tracks the developments of health-associated product types and the healthy-option positioning of competing brands across different food sectors. It provides the latest retail sales data 2018-2022, allowing you to compare health and wellness categories with each other or in the context of the total market for a sector. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market - be they new product developments, legislative context or lifestyle influences. Forecasts to 2027 illustrate how the market is set to change.
