Report description:

After discounters, hypermarkets were the best performing grocery channel in Turkey in 2023, in terms of value growth. With inflation still high, hypermarkets registered both a double-digit percentage increase in current and constant value sales. However, one outlet closed during the year.

Euromonitor International's Hypermarkets in Turkey report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
