Report description:

In the last two years of the review period, a noticeable trend in supermarket chains in Turkey involves a strategic reallocation of shelf space within their outlets. There has been a deliberate reduction in the variety of items related to clothing and toys, with a heightened focus on dedicating more shelf space to essential products such as foods, drinks, and home care products. This shift reflects an awareness that with soaring inflation, consumers are prioritising the essentials.

Euromonitor International's Supermarkets in Turkey report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
