### **Report description:**

Vending continued to see positive growth in Denmark in 2023. However, this was largely a correction as the category saw a strong decline during the COVID-19 crisis. The fact that consumers are once again spending more time outside and exercising, commuting to work and so on, has had a positive impact on vending consumption. Nonetheless, at the end of the review period, vending sales remained significantly below the levels seen prior to the outbreak of COVID-19.
