Report description:

Hypermarkets in Chile, as one of the largest channels within grocery retailers, continued to record a stable, albeit undynamic, performance in 2023. Security concerns remained a relevant issue for operators in hypermarkets at the end of the review period, not only inside the outlets as they attempted to reduce the losses caused by theft, but also in the overall surrounding environment.

Euromonitor International's Hypermarkets in Chile report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
