Report description:

The global market for mass notification system is projected to grow from USD 23.8 billion in 2024 to USD 65.1 billion by 2029, at a CAGR of 22.3% during the forecast period. This growth trajectory is attributed to several pivotal factors. The escalating demand for real-time notification and alert systems presents a significant opportunity within the mass notification system market. In today's dynamic business landscape, where instantaneous communication is imperative, organizations spanning diverse sectors acknowledge the vital importance of swiftly disseminating information to widespread and often disparate audiences. Be it emergency alerts, critical updates, or essential announcements, the capability to promptly reach recipients greatly influences outcomes. Mass notification systems offer a comprehensive solution to this exigency by facilitating organizations to dispatch targeted messages across a multitude of communication channels in real-time. These systems effectively engage individuals via mobile devices, emails, social media platforms, and voice notifications, thereby ensuring efficient delivery of crucial information. "The BFSI vertical is projected to be the largest market during the forecast period."

The BFSI sector is increasingly embracing mass notification systems due to their pivotal role in preserving operational continuity, fostering customer trust, and adhering to regulatory requirements. Mass notification systems facilitate prompt dissemination of security alerts, fraud notifications, and operational updates to customers, employees, and stakeholders. During crises such as cyberattacks, mass notification systems enable real-time coordination of incident response, thereby mitigating data breaches and financial losses. It also ensures compliance with rigorous industry regulations by promptly communicating regulatory changes and updates. Additionally, mass notification systems support business continuity strategies by assisting in disaster recovery initiatives and minimizing disruptions to financial services. Mass notification systems have emerged as an indispensable asset for

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

safeguarding sensitive information, maintaining operational resilience, and instilling trust among stakeholders in the BFSI sector.

"Among applications, Business Continuity & Disaster Management is registered to grow at the highest CAGR during the forecast period."

Business continuity & disaster management serve as indispensable pillars in organizational risk mitigation strategies. Within the mass notification system market, these application is instrumental in facilitating seamless communication and response protocols during crises. Integration of these features enables efficient coordination, timely dissemination of crucial information, and minimization of operational downtime. Such systems offer real-time alerts, ensuring swift communication with employees, stakeholders, and the wider public. Given the escalating significance of preparedness in contemporary business landscapes, there is a burgeoning demand for holistic mass notification systems encompassing robust business continuity and disaster management functionalities. This trend propels ongoing innovation and investment within the market.

"Among offering, the software segment is anticipated to account for the largest market share during the forecast period."

During the projected period, the software segment is poised to dominate the mass notification system market, holding the foremost market share. This segment encompasses a variety of tools and functionalities designed to facilitate swift and extensive dissemination of information during emergencies. Mass notification system software commonly provides diverse messaging channels, including SMS, email, voice calls, and integration with social media platforms, ensuring the delivery of messages through preferred communication mediums of recipients. Furthermore, advanced attributes such as location-based targeting enable the issuance of alerts pertinent to specific geographical areas. Many mass notification system software solutions also offer real-time monitoring and reporting capabilities to assess message delivery and response metrics.

"North America to account for the largest market size during the forecast period."

During the forecast period, North America is anticipated to have the largest market size in the adoption of mass notification systems. Businesses across North America are increasingly integrating mass notification systems to fortify emergency preparedness, comply with regulations, and ensure employee safety. These systems facilitate rapid communication during various crises such as natural disasters, security threats, and cyber incidents, thereby supporting business continuity by enabling smooth transitions to remote work and sustaining essential operations. the transparent and timely communication provided by mass notification systems contributes to effective reputation management and fosters trust among stakeholders. The integration of real-time updates empowers informed decision-making, while the scalability of these systems accommodates businesses of diverse sizes. Integration with IoT devices further augments the efficacy of the system. Overall, Mass Notification Systems are acknowledged as a strategic tool for enhancing resilience and safeguarding employees, assets, and operations within North American enterprises.

Breakdown of primaries

In-depth interviews were conducted with Chief Executive Officers (CEOs), innovation and technology directors, system integrators, and executives from various key organizations operating in the Mass Notification System market.

-□By Company: Tier I: 35%, Tier II: 45%, and Tier III: 20%

-□By Designation: C-Level Executives: 35%, Directors: 25%, and Others: 40%

-□By Region: North America: 40%, Europe: 20%, APAC: 30%, MEA: 5%, Latin America: 5%

Major vendors offering Mass Notification System solutions and services across the globe Siemens AG (Germany), Everbridge (US), Honeywell (US), Eaton (Ireland), Motorola Solutions (US), Blackberry (Canada), Johnson Controls (Ireland), Singlewire Software (US), OnSolve (US), AlertMedia (US), Alertus Technologies (US), F24 (Germany), HipLink (US), American Signal Corporation (US), ATI Systems (US), Finalsight (US), Omnilert (US), Regroup Mass Notification (US), Mircom (Canada), Konexus (US), Netpresenter (Netherlands), Illuminr (US), CrisisGo (US), Omnigo (US), Ruvna (US), Klaxon Technologies (UK), Crises Control (UK), ICEsoft Technologies (Canada), Squadcast (US), Pocketstop (US), Preparis (US), HQE Systems (US), Veoci (US), Text-Em-All (US), and DialMyCalls (US).

Research Coverage

The market study covers Mass Notification System across segments. It aims at estimating the market size and the growth

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

potential across different segments, such as offering, communication, application, vertical, and region. It includes an in-depth competitive analysis of the key players in the market, along with their company profiles, key observations related to product and business offerings, recent developments, and key market strategies.

Key Benefits of Buying the Report

The report would provide the market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall market for Mass Notification System and its subsegments. It would help stakeholders understand the competitive landscape and gain more insights better to position their business and plan suitable go-to-market strategies. It also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

-□Analysis of key drivers (increasing number of accidents and disasters, rising adoption of Internet Protocol (IP)-based notification devices, Advent of cutting-edge technologies, rising application of mass notification systems across various verticals), restraints (High cost of implementation, Lack of awareness about mass notification systems, Inadequate rules, and regulations across verticals), opportunities (Increasing demand for cloud-based mass notification systems, rapid growth of IoT and connecting devices, Rising need for real-time notification and alert system), and challenges (Ensuring the reliability and accuracy of the system, Lack of Interoperability, Issues related with data privacy and operational continuity) influencing the growth of the Mass Notification System market

-□Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product & service launches in the Mass Notification System market.

-□Market Development: Comprehensive information about lucrative markets □ the report analyses the Mass Notification System market across varied regions.

-□Market Diversification: Exhaustive information about new products & services, untapped geographies, recent developments, and investments in mass notification system market strategies; the report also helps stakeholders understand the pulse of the mass notification system market and provides them with information on key market drivers, restraints, challenges, and opportunities.

-□ Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players such as Siemens AG (Germany), Eaton (Ireland), Honeywell (US), Motorola Solution (US), Johnson Controls (Ireland), and others in the mass notification system market.
