Report description:

Despite recording high single-digit current value growth in 2023, the solid performance by supermarkets in Germany was largely driven by the historically high inflation rate, especially for food and drinks. In comparison to discounters, the other major grocery channel in the country, supermarkets underperformed as the German economy contracted in 2023, and the drop in consumer confidence resulted in greater cost-consciousness.

Euromonitor International's Supermarkets in Germany report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
