Report description:

The advanced wound care and closure market was valued for \$19.5?million in 2022 and is estimated to reach \$32.9?million by 2032, exhibiting a CAGR of 5.4% from 2023 to 2032.?The wound healing process is facilitated in two different ways, including traditional wound care (TWC) and advanced wound care (AWC). Advanced wound care and closures provide specialized treatment for chronic wounds that have not significantly healed during the conventional treatment. Thus, advanced wound care is developing as a standard solution for treating chronic wounds. These products offer various advantages over traditional wound care products including protection of wound from exogenous infection, maintain hydrated environment, and rapid healing of the wound. The advanced wound care products include advanced antimicrobial dressings, skin substitutes, negative pressure wound therapy, surgical sealant, topical tissue adhesives, and others.

The advanced wound care and closures market growth is significantly driven by increase in incidences of chronic wounds, surge in awareness about wound care, and rise in geriatric population. Chronic wounds such as traumatic wounds, venous ulcers, pressure ulcers, and others caused due to various medical conditions such as diabetes, and surgeries require long time for healing. To increase the healing process of chronic wounds, the advanced wound care and closure products are majorly used over the traditional wound care products. For instance, according to Australian Medical Association (AMA), 2023 report, about 450,000 Australians currently live with a chronic wound. In Addition, according to Healogics, LLC 2021, nearly 7 million Americans are living with chronic wound. Thus, rise in incidence of chronic wound drives the adoption of advanced wound care and closures.? Furthermore, surge in awareness about chronic wounds and their associated complications among the general population has increased the demand for advanced wound care solutions. Awareness campaigns, educational seminars, and training programs emphasize the benefits of using advanced wound care products over traditional methods. For instance, Wound Care Awareness

Week organized by the Healogics, LLC., focuses on the growing need for wound care. In addition, Kisaco Research has organized the Advanced Wound Care Summit Europe in November 2023. This event is dedicated to advancing cutting-edge wound care products and will emphasize on the needs of industry.

Moreover, growing prevalence of chronic wounds with an ageing population and increasing rates of diseases such as diabetes and heart disease further propel the demand for advanced wound care and closures, which, in turn, drives the market growth. However, advanced wound care products are more expensive than traditional wound care products. Thus, the high cost of advanced wound care products limits their adoption in the market. Furthermore, stringent regulations for manufacturing of advanced wound care dressing and devices act as a restraint to the market. However, development and launch of advanced products for wound management and surge in technological advancements are expected to create lucrative opportunities for the market growth during the forecast period.

The advance wound care and closures market is segmented on the basis of type, application, end user, and region. On the basis of type, the market is bifurcated into advanced wound closures and advanced wound care. The advanced wound closures segment is further classified into hemostatic and sealing agents, topical tissue adhesive, and wound closure devices. The advanced wound care segment is further classified into moist wound dressings, active wound care, and therapy devices. By application, the market is classified into burns, ulcers, and others. The ulcers segment is further divided into pressure ulcers, diabetic ulcers, and venous ulcers. Depending on end user, the market is classified into hospitals, clinic and nursing homes, and others.

Region-wise, the market is analyzed across North America (the U.S., Canada, and Mexico), Europe (Germany, France, the UK, Italy, Spain, and rest of Europe), Asia-Pacific (China, Japan, Australia, India, South Korea, and rest of Asia-Pacific), and LAMEA (Brazil, South Africa, Saudi Arabia, and rest of LAMEA).
