Report description:

The global alkoxylates market forecast was valued at \$6.9 billion in 2021, and is projected to reach \$11.0 billion by 2031, growing at a CAGR of 4.9% from 2022 to 2031.

Alkoxylates are chemical compounds produced by addition of ethylene oxide, propylene oxide, and butylene oxide to fatty hydrocarbon through alkoxylation process. It acts as wetting agent, cleaning agent, surfactants, and stabilizing agents, owing to which it finds applications in various end use industries including cosmetics & personal care, consumer products, paints & coatings, and pharmaceuticals. Furthermore, there are various types of alkoxylates such as fatty acid ethoxylates, alkyl phenol alkoxylates, and sorbitan ester alkoxylates. These types have various application in personal care, oil & gas, and consumer products sector.

Increase in global energy demand has led to rise in crude oil exploration and drilling activities in oil-rich countries where ethoxylate and alkoxylate are widely used as corrosion and scale inhibitors to avoid scale formation in pipelines and other drilling equipment. This acts as one of the key drivers responsible for growth of the alkoxylates market in the growing oil & gas sector. Demand for alkoxylates has witnessed the significant growth owing to its diversified range of applications in various end use industry such as oil & gas, personal care, consumer sector, agrochemicals, and among others. Furthermore, ease of availability of

raw material and suitability of alkoxyates in various end use industry has potential drive the market during the forecast period. However, stringent government policies regarding use of nonylphenol may hamper the growth of market.

In addition, some of alkoxyate are hazardous in nature thus, proper care is to be needed during the manufacturing process. Hence, rise in prices of crude oil has resulted in increase in costs of ethoxylation, thereby leading to excessive pressure on product price margins. These factors propel growth of alkoxyates.

However, risk associated with use of alkoxyates products in interior insulation systems is expected to hamper the market growth. For instance, capillary alkoxyates system (type of alkoxyates) is widely preferred for thermal insulation in cleaning agents industry. This alkoxyates system is used mostly for thermal insulation of cultural heritage buildings. However, interstitial condensation risk associated with alkoxyates systems is anticipated to hamper the market growth. Increase in raw material prices and energy costs, rise in competition, and enforcement of regulations on alkoxyates are key factors affecting business sustainability of alkoxyate manufacturers. These factors hamper growth of the alkoxyates market during the forecast period. Furthermore, rise in awareness regarding eco-friendly products has led to rise in popularity of high sold biodegradable and natural ethoxyates products, owing to its minimal or non-volatile organic compounds (VOCs). In addition, manufacture have put more emphasis on increasing in the production capacities of natural and environment friendly products owing to rise in consumers purchasing power towards expensive alkoxyates products. These factors are responsible for increasing sales of alkoxyates in several end-use sectors; thus creating lucrative opportunities for the market.

The alkoxyates market is segmented on the basis of grade, type, application, end-user industry, and region. On the basis of grade, it is segmented into natural ethoxyates and synthetic ethoxyates. On the basis of type, it is categorized into fatty acid ethoxyates, alkyl phenol ethoxyates, glycerin alkoxyates, sorbitan ester alkoxyates, and others.

On the basis of application, it is divided into wetting agent, cleaning gent, detergent, stabilizer, surfactants, and others. On the basis of end-user industry, it market is bifurcated into agrochemicals, paints& coatings, personal care, pharmaceutical, oil & gas, others. Region-wise, the market is studied across North America, Europe, Asia-Pacific, and LAMEA.

The major companies profiled in this report include Clariant AG, Croda International Plc, DOW, IMCD Group, Indorama Ventures Public Company Limited, Lamberti S.p.A., PCC Group, Scharer & Schlapfer AG, Solvay, and Stepan Company. The global alkoxyates market report provides in-depth competitive analysis as well as profiles of these major players

Key Benefits For Stakeholders

- This report provides a quantitative analysis of the market segments, current trends, estimations, and dynamics of the alkoxyates market analysis from 2021 to 2031 to identify the prevailing alkoxyates market opportunities.
- The market research is offered along with information related to key drivers, restraints, and opportunities.
- Porter's five forces analysis highlights the potency of buyers and suppliers to enable stakeholders make profit-oriented business decisions and strengthen their supplier-buyer network.
- In-depth analysis of the alkoxyates market segmentation assists to determine the prevailing market opportunities.
- Major countries in each region are mapped according to their revenue contribution to the global market.
- Market player positioning facilitates benchmarking and provides a clear understanding of the present position of the market players.
- The report includes the analysis of the regional as well as global alkoxyates market trends, key players, market segments, application areas, and market growth strategies.
