**Report description:**

Blockchain as a service (BaaS) allows customers to leverage cloud-based solutions to build, host, and operate their own blockchain apps and related functions on the blockchain. Furthermore, the rise in adoption of blockchain-enabled distributed ledgers among various fintech is owing to a surge in cyberattacks and an increase in the need to protect critical data of the companies.

The growth in number of cyber threats, post the outbreak of the COVID-19 pandemic, aided in propelling the growth of the global blockchain as a service (BaaS) solutions during the period, hence empowering the demand for blockchain as a service (BaaS) solution. Moreover, the rise in complexity of the global financial sector during the period has positively impacted the need for the blockchain as a service (BaaS) industry. However, the initial development and implementation costs of blockchain services can hamper the blockchain as a service (BaaS) market during the forecast period. On the contrary, the rise in adoption of blockchain technologies in the global economy is expected to offer remunerative opportunities for the expansion of the blockchain as a service (BaaS) market during the forecast period.

The blockchain as a service (BaaS) market is segmented on the basis of offering, enterprise size, application, industry vertical, and region. On the basis of offering, the industry is divided into tools and services. By enterprise size, the market is bifurcated into
