Report description:

The global calcium citrate market was valued at \$0.8 billion in 2021, and is projected to reach \$1.2 billion by 2031, growing at a CAGR of 3.7% from 2022 to 2031. Calcium citrate is calcium salt of citric acid that is commonly used as firming agent, acidity regulator, food preservative, anti-caking agent, and fortification agent in food and beverage, pharmaceutical, and others. Moreover, it is used in pharmaceutical sector to increase plasma calcium levels. Furthermore, it reduces calcium flux from osteocyte activity by significantly reducing the secretion of parathyroid hormone (PTH).

Rapid surge in young population coupled with rise in number of fitness enthusiasts have surged the demand for energy drinks where calcium citrate is widely used to increase the level of calcium. Furthermore, the increase in malnutrition among newly born babies and teenagers have surged the number of patients suffering from calcium deficiency where calcium citrate is used to treat calcium deficiency. This may act as one of the key drivers responsible for the growth of the calcium citrate market. In addition, increase in disposable income coupled with busy lifestyles have surged the demand for packed food items where calcium citrate is widely used as a food preservative for enhancing the shelf life. These These factors are predicted to contribute toward the global market growth.

However, health risks such as nausea/vomiting, loss of appetite, unusual weight loss, mental/mood changes, and others associated with the use of calcium citrate may hamper the growth of the calcium citrate market during the forecast period. On the contrary, robust dietary supplement demand where calcium citrate is widely used to enhance the calcium levels in various nutraceutical products is anticipated to increase the sales of calcium citrates; thus creating lucrative opportunities for the market. The calcium citrate market is segmented on the basis of form, end-use industry, and region. On the basis of form, the market is categorized into powder and granules. On the basis of end-use industry, it is divided into pharmaceutical, food and beverage, and others. Region-wise, the market is studied across North America, Europe, Asia-Pacific, and LAMEA.
