**Report description:**

The global display market generated revenue worth \$ 114.9 billion in 2021, and is projected to reach \$ 216.34 billion by 2031, to register a CAGR of 6.67% during the forecast period. The primary objective of installing urban security screening devices is to provide safety & security to people and their property.

The key factor that drives the growth of the display market include high demand for flexible display technology in consumer electronic devices, increase in adoption of electronic components in the automotive sector, and rise in trend of touch-based devices. Surge in adoption of displays in touch screen devices, rise in need for AR/VR devices, and commercialization of autonomous vehicles are expected to create lucrative growth opportunities for the display market in the future. Moreover, stagnant growth of desktop PCs, notebooks, and tablets hampers growth of the display market.

The display market is segmented on the basis of display type, technology, application, industry vertical, and region. By display type, the market is divided into flat panel display, flexible panel display, and transparent panel display. Flat panel display segment was the highest revenue contributor to the market, in 2021. The flexible panel display segment dominated the market, in terms of revenue, in 2021, and is expected to follow the same trend during the forecast period. Based on region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.
