Report description:

The global fiberglass window market size was valued at \$3,802.8 million in 2021, and is projected to reach \$5,855.6 million by 2031, registering a CAGR of 4.2% from 2022 to 2031.

A fiberglass window is composed of glass woven into plastic that makes it extremely strong. It is resistant to warping, scratches, and dents. It is durable at handling for strong weather elements such as rain, winds, and snow. In addition, fiberglass windows are very light in weight and have a very strong strength-to-weight ratio. This window material is stronger than vinyl, aluminum, and another wood composite that are widely used for the manufacturing of windows.

Rise in demand for fiberglass windows is driven primarily by surge in trend in residential buildings, increase in adoption of fiberglass windows in non-residential buildings; and the development of energy-efficient windows. In addition, increase in industrialization and urbanization in economies, including India and Africa, are expected to respond to the development of the fiberglass windows market. In addition, increased consumer spending on home renovations and improvement activities and improved new construction activities are expected to provide market participants with profitable growth opportunities.

The market is segmented on the basis of operating type, application, end user, and region. On the basis of operating type, the market is segmented into single & double hung, casement, picture, sliding, and others. On the basis of application, the market is divided into new construction and renovation & reconstruction. By end user, the market is divided into residential and non-residential. Region-wise, the global market analysis is conducted across North America Europe), Asia-Pacific, and LAMEA
