- Business User License \$5157.00
- Enterprise License \$8640.00

Report description:

The global food display cabinet market was valued at \$18.5 billion in 2021 and is projected to reach \$41.4 billion by 2031, growing at a CAGR of 8.4% from 2022 to 2031. Food display cabinets mean restaurant-type food that is visible to the customer before making a collection, so long as there is not usual anticipation of further preparation by the consumer before consumption. For example, cheese and deli meats generally have an expectation of further preparation by the consumer (e.g., combining with bread to make a cheese sandwich and a ham), and thus would not be subject to the menu labelling rules; other foods, such as prepared hot dogs or sandwiches, salad and freshly cooked pizza, and hot food bars do not have an ordinary expectation of further preparation by the consumer before consumption and thus would be subject to the menu labelling rules. The Food Display Cabinet is ideal for the sale of cold and hot food for example muffins, baguettes, drinks, sandwiches, pastries, etc while the Heated Food Display Cabinet is ideal for pastries, and pies, and much more. A trendy unit, it is ideal for fast-food outlets, supermarkets, restaurants, cafes and convenience stores. With only a small footprint means your valued retail space is preserved. With a modern design, it also provides a big sales capacity in a small package thanks to its adjustable shelves. The food display case is available in both heated and refrigerated models. Moreover, the service over the model is also available in the self-service model.

The product temperature of the refrigerator is very variable and has a direct impact on food safety and quality. These fluctuations are due to the type of box (vertical, horizontal), the location of the products in the box, and the fluctuations in the ambient temperature of the supermarket (day/night, seasons, business hours, air conditioning, etc.), and the environment. conditions. Display case (eg in front of another refrigerated display case or in front of a grocery store). This study suggests a heat transfer model for predicting the load temperature of an open vertical display case. This model considers heat transfer by conduction,

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

convection, and radiation. Four load positions (top / front, top / back, bottom / front, bottom / back) with distinctly different product temperatures were considered. The model was validated by comparing the predicted values with the experimental values. Later, the effects of various parameters such as supermarket ambient temperature, surrounding wall radiation temperature, and internal/external permeability were predicted. By integrating quality and microbiological prediction models, this approach can be used as a numerical tool to assess the quality and hygiene of products on display in showcases. The developed model will be further used in cold chain modelling involving various types of refrigeration equipment. The store sales counter has countless advantages. It can be stored at the desired temperature. That's why they have become a significant part of food marketing. They work on refrigerated countertops and should be used correctly for best results. There are various types of sales counters. It is vital to make sure that the refrigerator is maintained. If the meters are not maintained, they can be cheaper. They should be sustained to be energy efficient. These refrigerated display cases use two basic types of refrigeration. The two types of cooling used are gravity coils and forced air. The refrigeration structure used depends on the items displayed at the counter. Forced air-cooled sales counters rely solely on fans. Fans can circulate cold air throughout the cabinet to keep food cool. Showcases are primarily used to showcase baked goods and pre-packaged merchandise. The forced air cooling system can dry food. Do not leave food in the box for long periods of time. These boxes are known as refrigerated baking boxes. In this system, the cooling coil is located at the top of the cabinet. Cold air falls on the food. These display cases are ideal for storing and displaying raw meat, seafood, delicacies and salads. These cabinets have no drying effect on food. In addition, they are cheaper than appliances with recirculation devices. Size is an important consideration. It is important to understand that the size of the device is limited to the footprint in which the display case needs to be placed. There may be enough space for a large counter, but keep in mind that the food you store is perishable. However, if the display is too long, the counter may be enlarged and food may spoil and generate food waste. It will also cost you a lot of money. Choose the size that best suits your business. Please read the data sheet carefully before purchasing the device. It's important because it tells you if it meets the intake and exhaust requirements.

The food display cabinet market is segmented into type, material, end-users and region. On the basis of type, the market is categorized into heated food display cabinet market and refrigerated food display cabinet market. On the basis of material, it is segregated into glass, stainless steel, wood and plastics. On the basis of end-user, it is segregated into supermarkets/hypermarkets, restaurants, bakeries and others. On the basis of region, it is analyzed across North America (the U.S., Canada, and Mexico), Europe (UK, France, Italy, Spain, Russia, Turkey and the Rest of Europe), Asia-Pacific (China, Japan, India, Australia, Thailand and Rest of Asia-Pacific), and LAMEA (Brazil, United Arab Emirates, Argentina, and Rest of LAMEA). The players operating in the global food display cabinet have adopted various developmental strategies to expand their food display cabinet market share, increase profitability, and remain competitive in the market. The key players profiled in this report include Alto-Shaam Inc., Carrier Global Corp., FRIGOLASS S.A.I.C., Hatco Corp., HOSHIZAKI Corp., Standex International Corp., The Middleby Corp., The Vollrath Co. LLC, True Manufacturing Co. Inc., Metalfrio Solutions S/A, Panasonic Corporation, Dover Corporation, Arneg S.p.A, AHT Cooling System GmbH, Illinois Tool Work Inc., Lennox International Inc., Clabo Group, Carter Retail Equipment Ltd., QBD Modular Systems Inc., Zero Zone Inc., Igloo International.

Key Benefits For Stakeholders

- This report provides a quantitative analysis of the market segments, current trends, estimations, and dynamics of the food display cabinet market analysis from 2021 to 2031 to identify the prevailing food display cabinet market opportunities.
- The market research is offered along with information related to key drivers, restraints, and opportunities.
- Porter's five forces analysis highlights the potency of buyers and suppliers to enable stakeholders make profit-oriented business decisions and strengthen their supplier-buyer network.
- In-depth analysis of the food display cabinet market segmentation assists to determine the prevailing market opportunities.
- Major countries in each region are mapped according to their revenue contribution to the global market.
- Market player positioning facilitates benchmarking and provides a clear understanding of the present position of the market players.
- The report includes the analysis of the regional as well as global food display cabinet market trends, key players, market segments, application areas, and market growth strategies.

Key Market Segments

Table of Contents:

CHAPTER 1:INTRODUCTION

- 1.1.Report description
- 1.2.Key market segments
- 1.3.Key benefits to the stakeholders
- 1.4.Research Methodology
 - 1.4.1.Secondary research
 - 1.4.2.Primary research
 - 1.4.3.Analyst tools and models

CHAPTER 2:EXECUTIVE SUMMARY

- 2.1.Key findings of the study
- 2.2.CXO Perspective

CHAPTER 3:MARKET OVERVIEW

- 3.1.Market definition and scope
- 3.2.Key findings
 - 3.2.1.Top investment pockets
- 3.3.Porter's five forces analysis
- 3.4.Top player positioning
- 3.5.Market dynamics
 - 3.5.1.Drivers
 - 3.5.2.Restraints
 - 3.5.3.Opportunities
- 3.6.COVID-19 Impact Analysis on the market

CHAPTER 4: FOOD DISPLAY CABINET MARKET, BY TYPE

- 4.1 Overview
 - 4.1.1 Market size and forecast
- 4.2 Refrigerated Food Display Cabinets
 - 4.2.1 Key market trends, growth factors and opportunities
 - 4.2.2 Market size and forecast, by region
 - 4.2.3 Market analysis by country
- 4.3 Heated Food Display Cabinets
 - 4.3.1 Key market trends, growth factors and opportunities
 - 4.3.2 Market size and forecast, by region
 - 4.3.3 Market analysis by country

CHAPTER 5: FOOD DISPLAY CABINET MARKET, BY MATERIALS

- 5.1 Overview
 - 5.1.1 Market size and forecast
- 5.2 Glass
 - 5.2.1 Key market trends, growth factors and opportunities
 - 5.2.2 Market size and forecast, by region
 - 5.2.3 Market analysis by country
- 5.3 Stainless Steel
 - 5.3.1 Key market trends, growth factors and opportunities
 - 5.3.2 Market size and forecast, by region
 - 5.3.3 Market analysis by country

5.4 Wood

5.4.1 Key market trends, growth factors and opportunities

5.4.2 Market size and forecast, by region

5.4.3 Market analysis by country

5.5 Plastic

5.5.1 Key market trends, growth factors and opportunities

5.5.2 Market size and forecast, by region

5.5.3 Market analysis by country

CHAPTER 6: FOOD DISPLAY CABINET MARKET, BY END USER

6.1 Overview

6.1.1 Market size and forecast

6.2 Supermarket and Hypermarket

6.2.1 Key market trends, growth factors and opportunities

6.2.2 Market size and forecast, by region

6.2.3 Market analysis by country

6.3 Restaurants

6.3.1 Key market trends, growth factors and opportunities

6.3.2 Market size and forecast, by region

6.3.3 Market analysis by country

6.4 Bakery

6.4.1 Key market trends, growth factors and opportunities

6.4.2 Market size and forecast, by region

6.4.3 Market analysis by country

6.5 Others

6.5.1 Key market trends, growth factors and opportunities

6.5.2 Market size and forecast, by region

6.5.3 Market analysis by country

CHAPTER 7: FOOD DISPLAY CABINET MARKET, BY REGION

7.1 Overview

7.1.1 Market size and forecast

7.2 North America

7.2.1 Key trends and opportunities

7.2.2 North America Market size and forecast, by Type

7.2.3 North America Market size and forecast, by Materials

7.2.4 North America Market size and forecast, by End User

7.2.5 North America Market size and forecast, by country

7.2.5.1 U.S.

7.2.5.1.1 Market size and forecast, by Type

7.2.5.1.2 Market size and forecast, by Materials

7.2.5.1.3 Market size and forecast, by End User

7.2.5.2 Canada

7.2.5.2.1 Market size and forecast, by Type

7.2.5.2.2 Market size and forecast, by Materials

7.2.5.2.3 Market size and forecast, by End User

7.2.5.3 Mexico

7.2.5.3.1 Market size and forecast, by Type

7.2.5.3.2 Market size and forecast, by Materials
