Report description:

The global music event market size was \$152.2 billion in 2021 and is estimated to reach \$481.4 billion by 2031, registering a CAGR of 9.7% from 2022 to 2031. Musical performances of singing and playing instruments in various music shows, festivals, concerts, nightclubs, and similar venues are considered music events. The global music event market is anticipated to grow significantly owing to a rise in the number of live music performances by musicians. With the downturn in recorded music sales across the globe in the past few years, musicians and artists are highly dependent on live music performances for their livelihood. This is resulting in several music concerts, and music shows globally. High demand for music events among the youth is driving the sales revenues of the music event market across the globe.

Moreover, strong economic growth in Europe and Asia-Pacific owing to rapid industrialisation has resulted in a significant rise in the personal disposable income of consumers. High consumer spending on entertainment, especially among young consumers, is expected to boost the growth of the global music event market. Furthermore, the rise in music tourism is another major factor which is projected to foster the development of the market in the forthcoming years.

The rise in the penetration of m-commerce across the globe is resulting in rapid penetration of online ticket booking apps such as Ticketmaster, StubHub, and SeatGeek, significantly driving the sales of tickets for music events. Moreover, the availability of numerous personal care and cosmetics brands that usually target youngsters are investing heavily in creating brand awareness and visibility. It results in huge income for the music event organisers through sponsorships.

However, the presence of a enormous number of local and global market players in the music event industry has made it quite difficult for new players to enter the market. High infrastructure costs and fierce competition in the European market are acting as solid entry barriers for new entrants, which may hamper the growth of the global music event market.
