Report description:

The global non-contact infrared thermometer market was valued at \$368.5 million in 2021, and is projected to reach \$931.56 million by 2031, registering a CAGR of 9.83% from 2022 to 2031. A non-contact infrared thermometer is used to verify a temperature transmitter under flowing conditions and a successful calibration of the smart temperature transmitter. In addition, increase in demand for non-contact infrared thermometer in healthcare industry is expected to drive the growth of the market during the forecast period.

The growth of the global non-contact infrared thermometer market is majorly driven by mercury-free thermometers globally paired with increase in number of medical situations around the globe. Moreover, government/institutions initiative associated with enhancing medical/healthcare infrastructure at regional and global level is expected to propel the non-contact infrared thermometer market growth during the forecast period. On the contrary, distribution of non-contact infrared thermometers and related equipment's in remote areas and emerging nations to provide lucrative opportunities for the growth of the non-contact infrared thermometer market during the forecast period.

The non-contact infrared thermometer market research is segmented into mounting type, application, and distance to spot ratio. On the basis of mounting type, the market is bifurcated into handheld, and fixed. The handheld mounting type segment dominated the market, in terms of revenue, in 2021, and is expected to follow the same trend during the forecast period. By application, it is divided into medical, industrial, laboratory, food services and tools & measurement equipment's. The medical segment was the highest revenue contributor in 2021 and is anticipated to garner significant market share during the forecast period. By distance to ratio, the market is categorized into 6:1 to 12:1, 13:1 to 20:1, 21:1 to 50:1 and >50:1. The >50:1 segment acquired the largest share in 2021 and is expected to grow at a high CAGR from 2022 to 2031.

KEY BENEFITS FOR STAKEHOLDERS

This study comprises analytical depiction of the non-contact infrared thermometer market size and non-contact infrared thermometer market share along with the current trends and future estimations to depict the imminent investment pockets.

The overall non-contact infrared thermometer market analysis is determined to understand the profitable trends to gain a stronger foothold.

The report presents information related to key drivers, restraints, and opportunities with a detailed impact analysis.

The current non-contact infrared thermometer market forecast is quantitatively analyzed from 2021 to 2031 to benchmark the financial competency.

Porter's five forces analysis illustrates the potency of the buyers and suppliers in the non-contact infrared thermometer.

The report includes the market share of key vendors and Non-Contact Infrared Thermometer market trends.
